Day 03

How Did Archimedes Know?

LMTH 2040 — Calculus: A Multidisciplinary Approach

Wednesday, September 2, 2026

Reflection

Today we considered four problems:

- Archimedes and the quadrature of the parabola
- Archimedes and the approximation of π
- Senet and the problem of counting outcomes
- the sum of the first n cubes

Choose one of these problems.

What did you find interesting, surprising, difficult, or unresolved?
